Welcome to the 2022 5th Global Corporate Sustainability Forum (GCSF), organized by the Alliance for Sustainable Development Goals (A-SDGs) and hosted by the Taiwan Institute for Sustainable Energy (TAISE). With the international community constantly moving towards sustainability, the GCSF hopes to encourage public and private sectors, as well as institutions, from around the world to actively work towards achieving the United Nations Sustainable Development Goals (SDGs) and the Paris Climate Accord. As the global COVID-19 pandemic is brought under control and the world slowly returns to normal, this Forum connects diverse Taiwanese sectors with the international community. Taking "Road to Net Zero" as its theme and combining both online and in-person forums, the GCSF aims to implement net-zero action and stride forwards together on the road to Net Zero 2050.

For the first time, this Forum will be held over three consecutive days. In addition to the joint ceremony for the GCSA and TCSA Sustainability Awards, 20 domestic and foreign enterprises from both industry and academia with outstanding performance in net-zero action were invited to share their successful practices. This year's GCSA will include 1 online forum, 2 summits, and as many as 22 sub-forums, each bringing together leaders, professionals, and stakeholders from diverse sectors. Faced with the challenges and opportunities associated with the world's shared commitment towards a net-zero 2050, let us come together!
